

Paulson Family Benefit Raffle & Silent Auction

In September 2008, Mark was diagnosed with Myocarditis; a virus that attacked his heart caused irreversible damage. Over the last year Mark has fought to overcome the effects of Myocarditis and the permanent damaged that it has inflicted on his heart, kidneys and liver. Because of his fragile state, heart surgery is no longer an option. Mark is in end stage heart and kidney failure. Everyday is a blessing and struggle, not only for himself, but for his family.

Mark's friends would like to invite you to gather your neighbors, family and friends for a time to share stories, reminisce and show support to the Paulson family during this difficult time.
